

School Health Advisory Council Minutes
Jan. 24, 2019

The meeting was called to order at 2:00 by Laura Hughes. The members in attendance were:

Jacqueline Araujo
Laura Hughes
Kim Nash
Teri Roberts

Jennifer Siegel
Shane Strickland
Vicky Trichel
Shelby Willis

Laura Hughes began the discussion of the goals for the 2018-2019 school year. The main concern the committee wanted addressed is the alarming increase of vaping by students. Laura shared a picture of the different types of devices that have been taken up on the high school campus. The committee would like the goals to include vape awareness for parents, the danger of vape usage and awareness of programs that help students quit vaping. It was suggested that the video classes could produce a campaign to address these issues in addition to listing the information on the SISD website.

Another goal discussed was dangerous phone apps. It was suggested a link of the most common phone apps be listed on the website.

Shelby Willis made a motion that the 2018-2019 SHAC goals be vape and phone app awareness. Teri Roberts seconded and the motion passed unanimously.

Kim Nash gave a report on the Nutrition Administrative review. The child nutrition department did a phenomenal job and passed the review. There will be 2 more reviews this year concerning procurement.

Laura Hughes said the flu is not prevalent in the schools right now and has not affected attendance. But the district has healthy practices in places, cleaning schools, classrooms and buses with the Electrostatic Sprayers.

The meeting was adjourned at 2:44.
