

**School Health Advisory Council
Annual Report for School Board 2020-2021**

SHAC Members 2020-2021: Assistant Superintendent, Shane Strickland, Kim Nash, Laura Hughes (Chairman), Shelby Willis Co-Chairman), Vicky Trichel, Ashley Hall, Jennifer Siegel, and Madison Breighner (Student)

Goal 2020-2021: Triennial Wellness Assessment

The committee met three times. On October 20, 2020, members were given a summary of some of the activities that occurred over the summer and fall. A shot clinic was available to district students in August before school started. PCHD provided flu clinics on each campus to students and staff at the end of September. The district prepared before school started to meet COVID TEA and UIL guidelines. Laura Hughes discussed that students, staff, and visitors were educated on COVID policies. Students had temperatures checked one to two times a day. Staff and students were asked to screen for COVID symptoms before coming to school. The TEA provided PPE and other supplies to the district to help fight COVID. Every campus was required to have an isolation room for students that showed COVID symptoms or had to be quarantined. An overview of COVID protocol was given to the committee. Every COVID case and tracing involves a campus COVID team, Mr. Strickland, and Mr. Kelley. The district worked with Dr. Steven Welch (PCHD) for guidance related to COVID. Victory Electrostatic Sprayers were purchased to thoroughly clean areas. Laura Hughes informed the members that Parker County Hospital District received a grant that provided Medpods on each campus. Nurses will be trained by PCHD. Students and staff will have to register with the program to receive care next school year. In January, the TEA provided COVID-19 test kits to the district. Mr. Kelley, Mr. Strickland, and other staff were trained to perform the tests. The tests were only made available to students and staff.

On March 31, 2021, the members met for the second time. Kim Nash presented the Triennial Wellness Assessment. She read each goal, the committee discussed if the goal was met, exceeded or not met. After presenting and discussing each goal, it was determined that every goal had been either met or exceeded. Shane Strickland presented the new COVID policy regarding masks and quarantine. On March 9th, the board suspended the mask mandates on elementary campuses the Monday following Spring Break. On March 12th, staff were provided their first COVID vaccine by PCHD. On March 22nd, the trustees voted that after classes were dismissed on Friday, March 26th, masks were suspended for staff and

students. The quarantine policy was not changed. The mask requirement could be reinstated based on the number of cases on a campus or within the district.

The third meeting was held on Tuesday, May 11th. Laura Hughes discussed the number of COVID cases on each campus after the mask suspension. Quarantine policies were changed on Monday, April 26th. The student could have a COVID test on day 7 and if negative return to school but wear a mask and continue to monitor for symptoms. Parents could choose to quarantine their students for 10 days and not do a COVID test before returning but continue to monitor symptoms. The committee was made aware that Medpods will be used starting in the fall. PCHD held a second shot clinic to administer the 2nd COVID vaccine to staff. Leah Lacey RN at Goshen and SES resigned. Interviews were done on May 10th, and a new nurse was selected.
