## Medical Certification From Health Care Provider

A "**serious health condition**" means an illness, injury, impairment, or physical or mental condition that involves one of the following:

### 1. Hospital care

Inpatient care (i.e., an overnight stay) in a hospital, hospice, or residential medical care facility, including any period of incapacity or subsequent treatment in connection with or consequent to such inpatient care.

### 2. Absence plus treatment

(a) A period of incapacity of more than three consecutive calendar days (including any subsequent treatment or period of incapacity relating to the same condition), that also involves

(1) Treatment two or three times by a health care provider, by a nurse or physician's assistant under direct supervision of a health care provider, or a health care service (e.g., physical therapist) under orders of, or on referral by, a health care provider: or

(2) Treatment by a health care provider on at least one occasion that results in a regimen of continuing treatment under the supervision of the health care provider.

### 3. Pregnancy

Any period of incapacity due to pregnancy or for prenatal care.

### 4. Chronic conditions requiring treatments

A chronic condition that meets the following conditions:

(1) Requires periodic visits for treatment by a health care provider, or by a nurse or physician assistant under direct supervision of a health care provider

(2) Continues over an extended period of time (including recurring episodes of a single underlying condition)

(3) May cause episodic rather than a continuing period of incapacity (e.g., asthma, diabetes, epilepsy, etc.)

### 5. Permanent/long-term conditions requiring supervision

A period of incapacity that is permanent or long-term due to a condition for which treatment may not be effective. The employee or family member must be under the continuing supervision of, but need not be receiving active treatment by, a health care provider. Examples include Alzheimer's, a severe stroke, or the terminal stages of a disease.

### 6. Multiple treatments (Nonchronic conditions)

Any period of absence to receive multiple treatments (including any recovery period) by a health care provider or by a provider of health care services under orders of, or on referral by, a health care provider for restorative surgery after an accident or other injury, or for a condition that would likely result in a period of incapacity of more than three consecutive calendar days in the absence of medical intervention or treatment, such as cancer (chemotherapy, radiation, etc.), severe arthritis (physical therapy), or kidney disease (dialysis).

\* Treatment includes examinations to determine if a serious health condition exists and evaluation of the condition. Treatment does not include routine physical examinations, eye examinations, or dental examinations.
